PROFESSIONAL SUMMARY

Detail-oriented Medical Laboratory Science student at Nnamdi Azikiwe University with a strong foundation in data analysis and healthcare informatics. Skilled in SQL, Python, Power BI, Tableau, and Excel, with hands-on experience designing and analysing synthetic healthcare datasets. Adept at translating complex data into clear, actionable insights that support clinical and operational decision-making. Seeking internship or remote data analyst opportunities where medical domain knowledge and analytical skills can drive meaningful impact.

TECHNICAL SKILLS

Data Analysis	SQL (aggregations, joins, window functions, subqueries)
Programming	Python (Pandas, NumPy, data generation & validation)
Visualization	Power BI, Tableau, Excel Charts
Productivity	Microsoft Excel (pivot tables, formulas, dashboards)
Domain Knowledge	Healthcare data, blood bank operations, laboratory science
Soft Skills	Analytical thinking, attention to detail, problem-solving, communication

PROJECTS

Blood Bank Inventory & Management Analysis <i>Personal Portfolio Project</i>	2026
- Designed and generated a synthetic healthcare dataset of 15,000 rows using Python, simulating realistic blood bank operations across multiple hospitals in Nigeria. - Conducted in-depth analysis using SQL to calculate shortage rates, wastage rates, utilization rates, and average storage durations by blood type. - Identified O- as the most critically scarce blood type with a 96% shortage rate and 94.9% utilization rate, consumed primarily by Emergency, Surgery, and ICU departments. - Discovered AB+ had the highest wastage rate at 24.8% and the longest average storage duration of 27 days, indicating consistent overstocking. - Revealed October as peak demand month and Lagos University Teaching Hospital as having the highest wastage cost at ₦12.2 million. - Built an interactive Power BI dashboard visualizing KPIs including shortage rates, wastage costs, department consumption, and seasonal demand trends. - Delivered six data-driven recommendations to optimize procurement, reduce wastage, and improve blood availability for critical care.	

EDUCATION

B.Sc. Medical Laboratory Science <i>Nnamdi Azikiwe University, Awka, Nigeria</i>	2023 – Present
300 level student with coursework in haematology, clinical chemistry, microbiology, and laboratory management. - Independently developed data analytics skills through self-study and hands-on project work in SQL, Python, and business intelligence tools.	

CERTIFICATIONS & TRAINING

Data Analytics Job Simulation — Certificate of Completion <i>Deloitte x Forage</i>	June 2026
---	-----------

- Completed practical tasks in data analysis and forensic technology as part of Deloitte's virtual job simulation programme hosted on Forage.
- Gained exposure to how a Big Four consulting firm approaches real-world data and technology challenges.

Self-taught in SQL, Python, Power BI, Tableau, and Excel through online courses and independent study.
